Full-Stack Developer experienced in building scalable web applications using JavaScript, TypeScript, React.js, Node.js, REST APIs, and SQL databases (PostgreSQL, SQL Server). Strong background in Agile development, API testing, version control, and software engineering principles. Skilled in collaborating with other developers and delivering high-quality, maintainable code.

Key Skills

Languages:
- HTML
- CSS
- JavaScript
- TypeScript
- SQL

Libraries & Frameworks:
- Node.js
- React.js
- Express.js

Tools:
- Postman
- Git
- Trello
- Slack

Soft & Organisational Skills:
- Agile methodologies (Scrum).
- Organisation and time management skills.
- Presentation and speaking skills.

Education History

2025 - TechNative Digital - Tech Finishing School:
Worked on a variety of group and individual projects using industry standard tools and processes, whilst networking with developers and industry professionals.
Notable Projects:
- **Mixtape Magic:**
  A React application, supported by a Node.js REST API working alongside a PostgreSQL database. I had to collaborate in an Agile environment using Git and Trello to synchronize front-end React components with a Node.js/PostgreSQL back-end.
- **Mythic Minis:**
  An HTML, CSS, and JavaScript site created to be a catalogue and digital home for a fictional company (Mythic Minis).

2020-2024 - University of Southampton - MEng Computer Science (2:1):
Modules:
Completed a range of modules covering programming, software development and project management, game design and development, cyber security, and networks.
Notable Projects:
- **Group Design Project (1st):**
  Worked as part of a five-person team of Electronics and Computer Science students to develop a Virtual Reality simulation of a TM5-900 robot arm for the Meta Quest 2 using Unity. I took the lead on training my group members in the Unity engine, as I was the only member with prior experience. Throughout the project, we were required to give presentations of our product to other groups, lecturers, and our clients at OMRON.
- **Third Year Independent Project (1st):**
  I conducted research into the standard of teaching cyber security/digital forensics, serious games, and their applications to teaching cyber security/digital forensics. I then designed and developed, using Unity, a serious game intended to teach A Level or first-year university students about basic cyber security and digital forensics concepts.
- **Software Engineering Group Project (2:1):**
  Worked as part of a five-person development team to design and develop a piece of software for the purpose of runway re-declaration by air traffic control staff.

2018-2020 - Uckfield College - A-Level:
3 A-Levels - Mathematics (A), Computer Science (A), Physics (A) and an EPQ (B)

2016-2018 - Uckfield College - GCSE:
12 GCSEs 9-6 and A-B including Mathematics (9), Computer Science (8), Statistics (A), and Further Mathematics (A)

Employment History

October 2025 - Present: Software Support Analyst, Calculus Software Solutions, Uckfield
Responsibilities:
- Investigate and resolve complex software and IT issues using logs, SQL queries, and API tools.
- Collaborate with the development team to escalate bugs and reproduce issues raised by customers.
- Triage and prioritise issues effectively to achieve resolution within SLA.

Key Achievements:
- Taking a large volume of calls whilst maintaining a high level of customer satisfaction.
- Regularly achieving a closure rate of 40+ tickets per week.

March - October 2025: Post Office Counter Clerk, TGJones, Uckfield
Responsibilities:
- Provide friendly and effective service to customers on the Post Office counter.
- Responsible for correctly processing customer postal, banking, and other transactions.

Key Achievements:
- Using and developing my customer service and communication skills through helping customers choose the right services for their needs.

December 2024: Customer Assistant (Seasonal), Morrisons, Crowborough:
Responsibilities:
- Provide friendly and effective service to customers as part of the checkout staff.
- Ensure customer payments are taken correctly and that no sales of restricted products are made to underage customers (according to the Challenge 25 programme).
- Assist other staff with their responsibilities on the shop floor when needed.

Key Achievements:
- Using and developing my customer service skills through serving customers at the checkouts.
- Developing my versatility and flexibility by switching between checkout and shop floor responsibilities.

2018-2020: Kitchen Porter, Hartfields, Uckfield:
Responsibilities:
- Assist the rest of the kitchen staff with dishwashing, cleaning, and basic food preparation tasks.
- Process deliveries of produce and ensure they are correctly stored and recorded.

Key Achievements:
- Developing my interpersonal skills by working closely and effectively with the rest of the kitchen team.
- Contributing to a high standard of service through effective prioritisation and organisation of my responsibilities within the kitchen team.

2016: Volunteer Worker, Kit Wilson Animal Rescue Centre, Hadlow Down
